🚀 Zutopia Newsletter Update – March 2025

Dear Zutopia Community,

Big things are happening! We're making trading smoother, faster, and more intuitive with key updates to pricing integration, renew activity, and platform performance.

Plus, we've hit a major milestone—over $1.7 million transacted during our soft launch phase.

Let's get into it.

Seamless Pricing Integration with Zucoins Wallet v193

From the moment we introduced Zucoins Wallet v193, full pricing integration with Zutopia was the next step.

We've now enabled automatic price syncing between Zutopia and Zucoins Wallet, meaning:

- No more manual price entry—the transfer code now carries pricing details.
- Accurate and instant transaction values, matching exactly what you see in Zutopia.
- Faster, more seamless trading—just paste and go.

This upgrade ensures that every price per coin and total transaction value transfers instantly when you paste your transfer code into Zucoins, making the process even easier.

Renew Activity Update – Smoother & More Reliable

Since launching Renew Activity, we've been closely monitoring its performance to refine the experience.

We've now introduced several improvements to make it easier to stay active in the marketplace:

- Fewer interruptions to listings while maintaining strong engagement.
- A more seamless process for reactivating listings when you're ready to trade.
- Improved reliability in keeping active users connected to real trading opportunities.

These changes are already live, so you should notice a smoother experience the next time you use Zutopia.

Milestone Update – Over $1.7M Traded!

We always knew Zutopia had the potential to revolutionise peer-to-peer Zucoin trading, but even we've been blown away by the organic growth we've seen.

- $1.7 million in total transactions processed through the platform.
- 100% organic growth—achieved without any marketing.
- 77.9% successful transaction rate, with ongoing improvements to increase this further.

This early success proves that Zutopia is delivering real value and that the system is built for high-performance trading. We'll be enhancing user education to help even more people complete successful transactions.

March Focus: Enhancing Your User Experience

Before launching Zutopia internationally, we're ensuring the platform is as smooth and powerful as possible. This month, our focus is on:

- Fixing screen freezing issues for more stability and better performance.
- Enhancing sorting and filtering to make finding the right trades easier.
- Strengthening security to protect your transactions.
- Fixing notification issues so you never miss an important alert.
- Adding good-til-expiry orders for more flexibility in managing listings.
- Implementing 3DS payment security for extra fraud protection.

We're refining the experience to provide the fastest, most secure, and most user-friendly trading platform possible.

Need Some Help?

Explore our **User Guides**, **FAQs** and **Trouble Shooting** documents for assistance. These resources include detailed videos and step-by-step instructions to help you navigate any issues.

Still stuck? Feel free to reach out to **support@zutopia.com**. Our team will respond within 48 hours — thank you for your patience.

Happy Trading,

The Zutopia Team
