🚀 Zutopia Newsletter Update – May 2025

Dear Zutopia Community,

We're getting closer to a multi-currency launch, and momentum is building! Multi-currency support is now in internal testing, several long-standing bugs have been resolved, and key performance improvements are underway.

With over **$2.4 million transacted**, **2.8 million Zucoins moved**, and **more than 3,000 successful trades**, Zutopia is evolving fast—and we're just getting started.

Let's dive into the latest.

Multi-Currency Testing Begins

Multi-currency support has officially been delivered to our internal team for testing!

This update brings us one step closer to truly global trading. We expect testing to move into the next phase within the next **two weeks**, and we'll keep everyone posted on our progress as we hit key milestones.

Current Bugs Being Addressed

We’re working hard to fix a few key issues:

- A second notification for some transactions is not triggering correctly
- The **Fetch Transaction** screen is causing transactions to "stick"
- Intermittent downtime has affected availability – uptime is currently at **98%**, and improving this is a top priority

Milestone Update –
Over $2.4M Traded!
3,000+ successful transactions
100% organic growth
Zücoins

Milestone Update – Over $2.4M Traded!

Zutopia continues to prove itself as the future of peer-to-peer Zucoin trading.

In just a short time, we've seen tremendous momentum:

- **$2.4 million** in total transaction volume
- **2.8 million Zucoins** successfully exchanged
- **3,000+ successful transactions**
- **85 new accounts** in the last 7 days, pushing us to **2,101 total users**

While we're still in soft launch, these results are a clear signal that Zutopia is delivering real-world value and utility.

Our team is focused on refining the platform and educating users to drive even higher success rates and seamless trading experiences.

Latest App Improvements

✅ **Recently Fixed**

We've squashed several key bugs:

- The **"More than 2 listings"** bug has been resolved.
- A **database migration issue** has been successfully patched.
- **ZuNumber calculation** has been updated to handle balances with more than 5 decimal places — ensuring accuracy for all users.

🔒 **Security & Payment Enhancements**

- **3DS (3D Secure)** has now been fully integrated into the live app, adding an extra layer of protection for card payments.

Need Some Help?

Explore our **User Guides**, **FAQs** and **Trouble Shooting** documents for assistance. These resources include detailed videos and step-by-step instructions to help you navigate any issues.

Still stuck? Feel free to reach out to **support@zutopia.com**. Our team will respond within 48 hours — thank you for your patience.

Happy Trading,

The Zutopia Team
