Multicurrency Is Live — Here’s What’s New

Dear Zutopia Community,

We’re excited to announce that as of **Tuesday, August 5**, **Multi-currency support is officially live across Zutopia!**

This major update brings powerful new tools and improvements to your trading experience — built on the secure foundation of our now fully operational fraud management system.

Below is a full breakdown of what’s included in this release:

🚀 New Features

- **Multi-currency Support:** Trade and list in multiple currencies — seamlessly.
- **Dynamic Fees:** Domestic and international fee calculation and display now supported.
- **Real-Time Currency Conversion:** Estimates and contextual info now appear during listing and transaction flows.

- **User Preferences:** Set your **preferred currency** and **primary card** for faster trades.
- **Marketplace Filters:** Filter listings by currency for a tailored view.
- **Enhanced Card Management:** View full card details, handle expiry, and manage preferences easily.

🔧 Improvements

- **Precision Handling:** All monetary amounts are now currency-aware, using a new number type.
- **Database Upgrades:** Values stored with precision + currency data.
- **Stronger Validation:** Better error handling for accounts, preferences, and transactions.
- **Consistent UI:** Currency symbols, codes, and icons now display dynamically.
- **Improved Stripe Handling:** Faster, more stable payment management.

🐛 Bug Fixes

- Fixed fee threshold and minimum logic.
- Corrected listing and transaction validation based on updated crypto fields.
- Improved card expiry detection and fallback handling.

🛠️ Refactor & Style

- Refactored core Stripe and fee logic for maintainability.
- Upgraded database models to support currency-aware queries.
- Updated theme with new colour shades and UI polish.

🌍 Countries Supported

- United States
- European Union
- United Kingdom
- Norway
